The Snowmelter People

About Trecan

The name TRECAN, was originally an acronym for "Thermal Research and Engineering Canada", and the company's history and origins are steeped in combustion technology and thermal efficiency. Trecan Combustion is a Canadian company that has been designing and manufacturing Snowmelters for over 35 years and to date the company has delivered over 500 machines throughout the world with large numbers in the United States, Canada and Russia. Trecan is the only Snowmelter manufacturer that builds nine different models of Portable Snowmelters and more than ten single /multiple burner models of Stationary Snowmelters.

Trecan Snowmelters are the most thermally efficient Snowmelters available (approximately 98% efficiency). This is due to the submerged combustion, direct contact method of heating and transferring the energy from the combustion process to the water and snow in the melting tank. With over 35 years of engineering, manufacturing and practical experience Trecan Snowmelters are the most proven, tried and tested Snowmelters available.

Assembly Bay at the Trecan factory in Nova Scotia, Canada.

Trecan

by the Numbers:

- #1 in Snowmelters Worldwide**
- 35+ Years Experience**
- 100% Performance Guarantee**
- 500+ Installations Worldwide**
- #1 in Quality Assurance**
- 24/7 Remote Diagnostics**
- 9 Portable Models**
- 10+ Stationary Models**

Visit us online at www.trecan.com for:

- data sheets on all of our Snowmelters
- snow capacity reference chart
- photos & other technical information
- videos of our Snowmelters in operation
- customer testimonials
- information on Portable & Stationary Snowmelters

The Snowmelter People

Treca Snowmelters

With a reputation built on quality, integrity, experience and repeat customers, Treca Combustion is the most trusted Snowmelter manufacturer in North America. Treca is the only Snowmelter manufacturer that can produce and distribute an extensive customer referral list which is available to anyone, and that in itself speaks volumes about the company's reputation. **Experience counts, we have it!**

Many of the largest and most populated cities and municipalities in North America use Treca Snowmelters. The City of New York has been using Treca Snowmelters for many years and recently ordered nine Treca 60-PDs and seven Treca 135-PDs. In 2007, Treca supplied six Treca 60-PDs and ten Treca 80-PDs to Moscow, Russia.

Most of the largest and busiest airports in North America use Treca Snowmelters, including: Pearson International Airport in Ontario, Newark Airport in New Jersey, Logan International Airport in Massachusetts, Minneapolis - St. Paul International Airport in Minnesota, JFK International Airport and La Guardia International Airport in New York.

Treca Snowmelters do not use water pumps or boiler / immersion tubes. Our Submerged Combustion Direct Contact process of heating and transferring energy is the most efficient and reliable method for melting snow.

#1 in Quality Assurance

In 2002 Treca Combustion became the only Snowmelter manufacturer to obtain the ISO 9001:2000 certification, ISO's most widely known standard. ISO 9001:2000 has become an international reference for quality assurance requirements in business-to-business dealings all over the world. ISO 9001:2000 primarily ensures that our products or services satisfy the customer's quality requirements. What does it all mean? Having completed the ISO 9001:2000 registration, Treca Combustion has ensured their customers that a strict quality assurance program has been formed and implemented. ISO Registered companies have had dramatic reductions in customer complaints, significant reductions in operating costs and increased demand for their products and services. ISO Registration is simply good business.

Treca Sales and Rentals

Most Snowmelters are built to order, however, Treca maintains a limited inventory of new and used Snowmelters that are available for sale, rent and demonstrations. From time to time we also have used Snowmelters in the form of buy backs or trade-ins available for sale. Ask us about our rent-to-own option.

Customer Testimonials

With a proven history, backed by over 35 years of experience and a 25 year life span, Treca Snowmelters are the most reliable, cost effective, time tested and efficient Snowmelters available today. Don't just take our word for it, ask any of our over 500 customers what they think. For more information on Treca Combustion products and services, please visit us on line at www.treca.com

Remote Communications

All Treca Portable and Stationary Snowmelters are available with a Remote Communications Package enabling Treca to monitor operations and conduct diagnostic checks 24/7 on Treca Snowmelters almost anywhere in the world. This unique capability also allows for remote trouble shooting and Snowmelter software upgrades (if required and when available). We also offer an optional integrated GPS module.

"Treca will guarantee the capacity of our Snowmelters based on typical snow not containing any ice entering the Snowmelter at -1°C (30°F)."

* Conditions apply

With a life span of 25 years the Treca 60-PD Snowmelter is the choice of many cities, municipalities and snow contractors throughout North America and Russia. Treca Snowmelters require only 1.5 US Gallons (5.6 Litres) of diesel fuel to melt 1 ton of snow.
